

Redback USA who brought the fire service into the new millennium by marketing the original slip-on 'Station Boot' is introducing a new concept in station footwear. This high technology, Dual Density Vulcanized Rubber sole system provides the comfort, durability that Redback is famous for. This line of footwear is designed as a 'True Dual®' dual purpose station/wildland boot that provides orthopedic support for the day to day station operations and provides the safety of a heat resistant 600 degrees f sole.

1. Padded collar with three ribs for comfort and leg seal

2. Full grain leather upper water, fire and heat resistant.

3. Nomex thread

4. Antistatic outsole and insole

5. Mil-Spec hardware
6x Army Speed loops
2x lace hooks on top

6. Hitech Composite ladder shank

7. Hard wearing / Self Cleaning, Heat Resistant Vulcanised Rubber Air outsole

8. Army mesh AirNet Vamp and Tongue lining

9. Army Waffle footbed and padded tongue insert

10. Wide widths only, E-EE

11. Trilaminare Insole with polymer core for torsional and strength penetration resistance

12. Wide toe box provides for all day comfort

- **Lightweight**
- **Redback's famous Anatomic support**
- **Premium Fill Grain Leathers**
- **Shock absorbing Air cushion sole**

The DDVR Technology is far superior to the 100 year old 'sewn on sole' and resists delamination from the leather upper. Versions of these boots are battle tested in Iraq by Aussie and US Forces.
